PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 4+ years of experience in cloud infrastructure, Kubernetes, CI/CD automation, DevSecOps, and infrastructure as code across AWS, GCP, and hybrid cloud environments. Skilled in designing scalable cloud-native platforms, automating deployment pipelines, improving system reliability, and optimizing operational workflows. Strong expertise in Kubernetes, Terraform, Docker, Jenkins, GitOps, monitoring, and cloud security with hands-on experience supporting production-grade applications and distributed systems.

TECHNICAL SKILLS

Kubernetes, Docker, Terraform, Jenkins, Git, CI/CD Pipelines, AWS, GCP, Linux, Helm, Ansible, Grafana, Prometheus, CloudWatch, Azure DevOps, Nginx, Cloudflare, karpenter, fluentbit, keda, istio

---

PROFESSIONAL EXPERIENCE

Quest Global Engineering Services Pvt Ltd

Senor DevOps Engineer

Jan 2025 – Present

- Working as a dedicated DevOps Engineer for a healthcare product focused on ECG machine ecosystem applications.
- Supporting cloud-native infrastructure and CI/CD pipelines for microservices powering web and mobile applications.
- Managing Kubernetes-based production environments and handling infrastructure setup, deployment planning, and release transitions.
- Designing and maintaining scalable infrastructure architecture with monitoring and observability solutions.

- Implemented and managed Kubernetes ecosystem tools including Karpenter, Istio, KEDA, Fluent Bit, Prometheus, and Secrets Store CSI Driver.
- Developed and maintained custom Helm charts for microservices and application deployments.
- Managed Helm chart versioning, updates, and deployment standardization across environments.
- Collaborating with development and platform teams to improve deployment reliability, scalability, and operational efficiency.
- Automated deployment workflows and infrastructure provisioning using DevOps best practices.
- Supported production monitoring, troubleshooting, and platform stability for healthcare applications.

Activelobby Information Systems Pvt. Ltd

DevOps Engineer

May 2023 – Jan 2025

- Assisted in the design and implementation of CI/CD pipelines, reducing deployment times for clients.
- Collaborated with development teams to integrate automated testing into CI/CD processes, improving release reliability.
- Managed Kubernetes clusters ensuring high availability and scalability of applications.
- Automated routine operational tasks using scripting, reducing manual effort by 40%.
- Utilized Terraform to provision scalable infrastructure across AWS and GCP platforms including EC2, Load Balancers, VPCs, MSK clusters, SSM, VPN tunnels, Lambda, and Cloud Composer.
- Provided on-call support for production systems and resolved critical incidents.
- Documented system configurations and deployment procedures to improve internal knowledge sharing.
- Configured 24/7 monitoring using CloudWatch, Zabbix, and Datadog.
- Automated infrastructure and system configuration management using Ansible.
- Configured EFK and ELK stacks for Kubernetes cluster logging and observability.
- Prepared deployment and configuration documentation for operational processes.

Apton Works Pvt Ltd

Jr DevOps Engineer

Nov 2021 – May 2023

- Managed Git repositories, releases, and branching strategies using GitHub.
- Orchestrated multiple CI/CD builds and deployment workflows.
- Utilized systemd services to deploy Docker containers as services, improving system reliability.
- Dockerized applications and reduced image size using multi-stage Docker builds.
- Deployed Ruby on Rails applications using Passenger application server across multiple environments.
- Created CI/CD pipelines using Concourse CI and ArgoCD to implement GitOps workflows.

- Migrated applications from cloud virtual machines to Kubernetes clusters.
- Managed DNS configurations in Cloudflare and configured canary endpoint checks using Cloudflare and CloudWatch.

MAJOR PROJECTS

Healthcare ECG Platform Application

- Worked as a dedicated DevOps Engineer for a healthcare platform focused on ECG machine integration and digital healthcare solutions
- Supported infrastructure and CI/CD pipelines for microservices powering web and mobile applications.
- Managed Kubernetes-based infrastructure and production deployment workflows.
- Implemented Kubernetes platform components including Istio, Karpenter, KEDA, Fluent Bit, Prometheus, and Secrets Store CSI Driver.
- Developed and maintained custom Helm charts for multiple microservices.
- Designed monitoring, observability, and deployment strategies for scalable production environments.
- Supported infrastructure transition, release management, and production deployment activities.

Cryptocurrency Cashback Application

- Built complete infrastructure across AWS and GCP using Terraform.
- Managed multiple environments including Development, QA, Staging, and Production.
- Deployed applications in private GKE and EKS clusters.
- Automated application releases using ArgoCD pipelines.
- Configured EFK stack for centralized logging and monitoring.
- Built and managed data pipeline infrastructure for AWS and GCP data migration.

OTT Streaming Platform & Video Analytics Application

- Implemented a hybrid cloud architecture for video streaming and analytics.
- Worked with Kubernetes, AKS, Kafka, Cassandra, PostgreSQL, MinIO, Redis, and Cloudflare.
- Supported scalable, high-performance infrastructure for global live streaming and analytics workloads.
- Enabled real-time monitoring, automation, and platform reliability.

EDUCATION

Bachelor of Science in Computer Science

Emmanuel College, Kerala
University of Kerala
2018 – 2021
